

Guidelines for populating the database

Please read the entire guidelines before starting to populate your tables.

- The data should be populated for the time period from 1st January 2016 to 31st May 2016.
- There should be at least 25 users. 20 customers (with 10 students and 10 non students) and 5 managers.
- At least 5 customers do not have any payment information yet.
- At least 5 customers have more than one credit card stored.
- There should be at least 6 stations.
- There should be at least 8 train routes.
- Each train route needs to have at least 3 stops. (for example, a train: Atlanta-Washington-New York-Boston has four stops)
- There should be at least 40 reservations already existing in the Reservation table, out of which 20 should have a future end date (i.e. end date after April 26, 2015). At least 7 of these reservations should have two tickets (reserved two trains in the same reservation). At least 10 of these reservations are cancelled.
- Each train route needs to be reserved at least twice.
- There should be at least 20 reviews. Each train route needs to be reviewed at least once.
- Make sure there is enough data populated in the system for you to demo
